PERSONAL SUMMARY

Dynamic Construction & Logistics Manager at Casa Tres Cervezas, adept at leading cross-functional teams to achieve project milestones. Proficient in AWS services and API development, I excel in technical communication and collaboration, driving efficiency and innovation in large-scale builds. My adaptability and detail orientation ensure successful project delivery.

TECHNICAL SKILLS

- TypeScript and JavaScript
- React and Node.js
- HTML and CSS
- Bootstrap framework
- AWS services (Lambda, S3, DynamoDB)
- API Gateway and CDK
- REST and GraphQL APIs
- MongoDB and Mongoose
- OAuth implementation
- Postman for API testing
- Git and GitHub version control
- VS Code development environment
- Chrome DevTools usage
- Performance optimization strategies
- Collaboration skills
- Technical communication proficiency
- Agile methodologies
- Rapid learning ability
- Cloud computing literacy
- Adaptability in work environments
- Detail orientation

PROFESSIONAL EXPERIENCE

Construction & Logistics Manager

Casa Tres Cervezas – San Miguel de Allende, Mexico
June 2009 – Present

- Directed cross-functional teams (contractors, engineers, designers) through complex, multi-phase construction projects, ensuring timely delivery within budget
- Created and maintained detailed status reports, schedules, and milestone tracking systems — foundational experience for sprint planning and project documentation in tech
- Implemented agile-style workflows to adapt to evolving client requirements and site constraints, reinforcing iterative problem-solving and adaptability
- Communicated with owners in English and the foreman and workers in Spanish, managing expectations and resolving issues with transparency and diplomacy
- Developed and improved systems for inventory, logistics, and vendor coordination, demonstrating strong operational and systems thinking

Construction Manager
Bay 10 Ventures LLC – Hilton Head Island, SC
Jan 2000 – Jan 2008

- Managed day-to-day operations across multiple high-end residential builds, personnel attendance, logistical, operations and on-site execution
- Designed and maintained tracking tools (spreadsheets, custom reporting systems) to monitor material usage and task dependencies — now applicable in technical project tracking
- Supervised diverse teams and ensured safety, compliance, and high-quality standards across all project phases
- Gained experience in problem-solving under pressure and leading teams through shifting deadlines, valuable for fast-paced tech environments
- Cultivated strong communication and leadership skills, critical for technical collaboration in software development teams

EDUCATION

Expected in 07/2025	Full-Stack Web Development Certificate, Full Stack Web Development <i>Career Foundry</i> , Berlin, Germany
02/2024	Intro To Web Development, Web Development <i>Career Foundry</i> , Belin Germany
06/2005	B.A., Latin American History <i>Fort Lewis College</i> , CO

ADDITIONAL INFORMATION

Learning AWS Serverless (Lambda, CDK, S3, API Gateway), Strong foundation in full-stack JavaScript, Motivated to build scalable, sustainable cloud apps

PROJECTS

MyFlix App - Full-Stack Movie App, React, Node.js, Express, MongoDB, JWT, Built secure movie browser with authentication and API integration, Implemented responsive UI, protected routes, and CRUD features
MyFlix API - Backend RESTful API, Node.js, Express, MongoDB, Designed scalable API with user and movie endpoints, Integrated Mongoose validation and JWT-based auth
My Pokedex App - Client-Side Web App, JavaScript, jQuery, Pokémon API, Fetched and displayed Pokémon data via modals and dynamic UI
